06/2016 – 11/2017

New York, United States

Vectormax, *Web Engineer*

Vectormax provides a software solution to deliver high-quality live linear broadcast television to large scale audiences.

- Analyzed, Implemented, tested and deployed user interface to administrate an online TV provider using AngularJS and Node.JS.
- Created a dashboard showing all the informations about the system (how many users are online, what channels are the most viewed in a timeline, TV boxes' status, etc…) and all the users information with the ability to make changes inline.

01/2012 – 05/2016

San Francisco - New York, United States

Cater2.me, *Web Engineer*

Cater2.me offers customized catering solutions for companies and distributed teams.

- Worked closely with the marketing team to implement and test all of our responsive landing pages and email templates in Mailchimp. Collaborated with our designer on each campaign.
- Implemented, tested and deployed smaller static websites (e.g. www.officeheroes.org).
- With our graphic designer, iterated on several make-overs to our Wordpress blog.
- Built functionality in PHP on top of suiteCRM to improve the Sales team's workflow.
- Integrated APIs to help the customer experience using Twilio, Google and Mailchimp.
- Implemented, tested, and deployed v1.0 of customer-facing and client dashboard website. Designed MySQL database schema, implemented business logic in PHP, and designed and implemented the front-end using JS, HTML, and CSS.
- Implemented, tested, and deployed the front-end v2.0 of customer-facing front-end using JS, HTML, and CSS.
- Implemented and maintained new features for our customer dashboard in PHP on a daily basis.
- Learned and developed small features in ROR on our new environment.

05/2011 – 11/2011
